LED-AUTO

LED Bulb Kit for Automatic Shifter [Vanagon]

1. Loosen the Allen-head machine screw (2.5mm) holding the shift knob on and remove shift knob.
2. Remove the four screws holding the shifter housing to the vehicle floor (two at the base corners and two at the cowl wall). Shift the selector into neutral/drive and slide the housing up and off of the shifter shaft. Untwist the bulb holders from the housing.
3. Unplug the old bulb/housing assembly from the wiring, and plug in the new LEDs with housing (check for proper LED polarity). Twist the holders back in place in the housing.
4. Re-assemble the shifter housing and shifter (reverse of removal).

NOTE: If your bulbs are wired in series, they will need to be re-wired in parallel. See image below.
